AMENDMENTS TO THE CLAIMS:

This listing will replace all prior versions, and listings, of claims in the application:

5   **LISTING OF CLAIMS:**

1) (currently amended) A method of display of at least one digital image, ~~called~~ as an initial image, on a monitoring screen having a resolution less than ~~the~~ a resolution of the initial image, the method comprising the ~~following~~ steps of:

10   a) ~~the automatic identification in the image of at least one~~ automatically identifying a plurality of zones-of-interest in the image ~~(32a, 32b and 32c)~~,

b) for each zone-of-interest identified, ~~the automatic selection of~~ automatically selecting an image portion ~~(34a, 34b and 34c)~~ containing the zone-of-interest,

15   c) ~~the formation of~~ forming a sequence of images to be displayed comprising selected image portions corresponding to different zones of interest, and

d) ~~the command of~~ commanding an enlarged display of the images of the sequence, the sequence being shown as an ordered series of images.

20   2) (original) A method according to Claim 1, wherein, during step d), the display is a full screen display.

3) (currently amended) A method according to Claim 1, wherein the step a) comprises the automatic identification of initial image zones showing faces,

25   the zones showing faces being selected as the zones-of-interest ~~(32a, 32b and 32c)~~.

4) (Canceled)

5) (currently amended) A method according to Claim 1 further

30   comprising the automatic selection of additional image portions ~~(34i)~~ located on a path ~~(36)~~ linking ~~the~~ two selected image portions containing zones-of-interest, and

the insertion of these additional image portions in the sequence of images to be displayed, so as to simulate panning between the image portions containing a zone-of-interest.

6) (currently amended) A method according to Claim 1, comprising capturing ~~the capture of~~ the initial image with a digital camera ~~(12)~~, ~~the transmission of~~ transmitting the image to a remote processing entity ~~(14)~~, ~~the execution of~~ executing at least one of the steps a), b) and c) in the remote processing entity and ~~the~~ sending ~~of~~ a corresponding display command from the processing entity to a display device.

7) (currently amended) A method according to Claim 6, wherein the execution of the ~~three~~ steps a), b), and c) occurs in ~~a~~ the remote processing entity ~~(14)~~ and wherein the display command comprises data ~~(44)~~ identifying the image portions to be displayed.

8) (currently amended) A method according to Claim 6, wherein the display command comprises image data ~~(42, 42i)~~ relating only to the image portions to be displayed.

9) (currently amended) A method according to Claim 1, wherein the display ~~command~~ commanding step comprises, for each image portion, ~~and~~ an enlargement ratio instruction.

10) (original) A method according to Claim 1, wherein zones-of-interest are identified in many initial images and wherein the sequence is formed with image portions from many initial images.

11) (original) A method according to Claim 1, wherein the entire initial image is shown in the sequence.
